

Everest

Everest is a mid-early variety that combines mildew resistance, high yield potential, and a concentrated harvest period to help maximize your investment. Everest performs well for late summer and fall harvests in the Northeastern United States and Eastern Canada. That's why Everest has become the reliable variety growers have come to depend on!

TRIAL DATA

<b>Approx. Days to Maturity</b>	80 Warm 105 Cool
<b>Head Shape &amp; Size (in.)</b>	Medium dome 4 – 6
<b>Average Plant Height (in.)</b>	22
<b>Location</b>	Salinas Valley Desert Southwest Northeast
